

CELLAR PRO OFFERS NO COST ENGINEERED SIZING FOR YOUR CELLAR

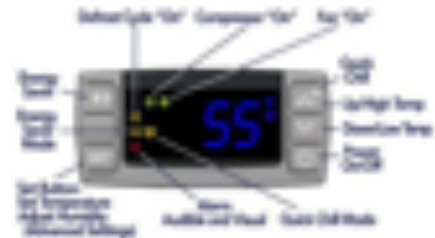

Our cellar specific cooling products deliver the greatest ownership value for wine cellar cooling today. Products include air and water cooled operation.

Clients find that equipment runs less and lasts longer when properly sized.

THE WORLD'S BEST COOLING FOR PROPER AGING

Our products feature U.S. built equipment; outstanding reliability, easy controls, super-quiet operation and operating capacities suited for cabinets, and the most demanding custom cellar applications.

THROUGH WALL UNITS

Our quietest cooling units are designed for wine cabinets and small cellars.

SPLIT SYSTEMS

For quieter operation, our split systems permit the evaporator and condensing units can be located in separate locations and connected via refrigerant line-set.

FULLY DUCTED SYSTEMS

Our ducted systems permit the evaporator and condensing units located away from the smallest to the largest wine cellars built today.

PROTECT YOUR WINE WITH CELLAR PRO
